FLOOD HAZARD  
OVERLAY

to minimize flood hazards and damage

- floodway** In the Town, development is prohibited. See Town Zoning Regulations, §405(b)(1)  
In the Village, development is prohibited unless a registered professional engineer certifies that the proposed development will not increase flood level.  
See Village Zoning Regulation §404(E)(1)
- floodplain** See Development Standards, Village §404(E)(2); Town §405 (b)(2)

**Please respond to the following:**

What is the NFIP base flood elevation of parcel? \_\_\_\_\_

Does proposal involve development or alteration of a structure?  yes  no

If **yes**: what is the elevation (relative to mean sea level) of lowest habitable floor? \_\_\_\_\_

If flood-proofing will be used in lieu of elevation, please submit certification from licensed engineer.

Please describe the structure: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

On-site waste disposal system?  yes  no

If **no**: please attach a letter from Town verifying sewer-hookup.

If **yes**: please explain, and attach a plan showing, how its location avoids impairment to and contamination from the system during flooding. See §405(E)(d),(e),(g )

\_\_\_\_\_

\_\_\_\_\_

Alteration or relocation of any water course?  yes  no

If **yes**: please describe the alteration and explain how the flood carrying capacity will be maintained (Certification by a licensed engineer may be required)
